SNAP IT[®] ENGINEERED TUBE PLUGS

***CUT YOUR DELIVERY TIME FROM WEEKS,
TO JUST DAYS***

***See How Fast
We Can Deliver!***

SNAP IT[™]
JR & SR
ENGINEERED TUBE PLUGS

***The best solution for permanently sealing leaking tubes in
heat exchangers, boilers, and condensers!***

800-456-8721 | sales@USAIndustries.com

Easy Hydraulic Installation • ASME PCC-2 Compliant • SR Model Rated Up To 7000 PSIG
• Lot Tested For MAXIMUM QUALITY • No Tube Sheet Damage or Welding Required

ABOUT US

As an **ISO 9001:2015** certified manufacturer and supplier, we operate facilities in Texas and Louisiana. Our products and services extend to oil and gas refineries, liquefied natural gas (LNG), chemical, petrochemical, pharmaceutical, power generation, pipeline, engineering, procurement, construction (EPC's) and other various industrial process manufacturing facilities globally. We specialize in designing, manufacturing, and supplying critical pipe and tube products that ensure the safety and efficiency of plant Turnarounds, Shutdowns, Maintenance & Repairs, and Capital Projects.

OUR MISSION

To rapidly deliver essential products & innovative solutions to our customers.

OUR COMPANY'S CORE VALUES

TRUST

SUPPORT

COMMUNICATION

COLLABORATION

CREATIVE SOLUTIONS

At USA Industries, we believe an accountable workplace is built upon a foundation of ***trust***. We support one another and value open, honest ***communication***. We meet the needs of each other and our customers through ***collaboration*** and ***creative solutions***. These values are foundational in all of our people and our core processes.

OUR CUSTOMERS

Our customers include owner-operators, resellers, contractors, and OEMs. We recognize the challenges in maintaining and repairing industrial facilities, and our product specialists and shop staff are available 24/7, 365 days a year to discuss emergency needs and fulfill orders. Understanding the unique requirements of our industrial customers, we also offer custom machining services with quick turnaround times.

(Patent No. 9,546,889)

When it comes to isolating or testing piping, ***Think of USA Industries First!***

We maintain a substantial inventory of blind flanges and isolation and hydrotest thickness paddle blinds, with sizes ranging from 1/2" to 96" and flange ratings spanning 150# to 2500#. Our assortment of pipe plugs includes the exclusive and patented GripSafe®ST models, crafted for high-pressure environments, alongside our standard Double Block & Bleed, Flange Weld Test, Industrial Isolation, Grip Type, plumbers-type Inflatable Balloons, and Wing Nuts. We also manufacture bleed rings, rodout tools, and the cutting-edge EZ Lock Blind Rack® for paddle blind storage solutions.

PADDLE BLINDS - ISOLATION & HYDROTEST THICKNESSES

See chart on page **PI-7** for our standard thicknesses or specify your own.

- Sizes 1/2" — 96"
- Thickness options: Isolation, Hydro and Custom
- Pressure Rating Class options: 150# — 2500#
- Material options: Stocked in 516 - Gr70 carbon steel & 304/316 stainless steels; can supply any alloy
- Finish options: Mill or Serrated (125-250 RMS)
- Face options: Flat, Raised, RTJ Male or Female (Octagonal or Oval gasket types)
- Handle options: T, 7, Straight
- Meets ASME standards: B16.48 • B16.5 • B16.20 • B16.47 (For larger diameter flanges)
- Products feature easily identifiable coloring, markings, and handles
- Can be made to your customized specifications
- Q/A & Q/C: manufactured under our strict ISO 9001: 2015 Quality Assurance Program

HANDLE COLORS					
150#	RED	300#	BLUE	600#	YELLOW
900#	GREEN	1500#	WHITE	2500#	ORANGE

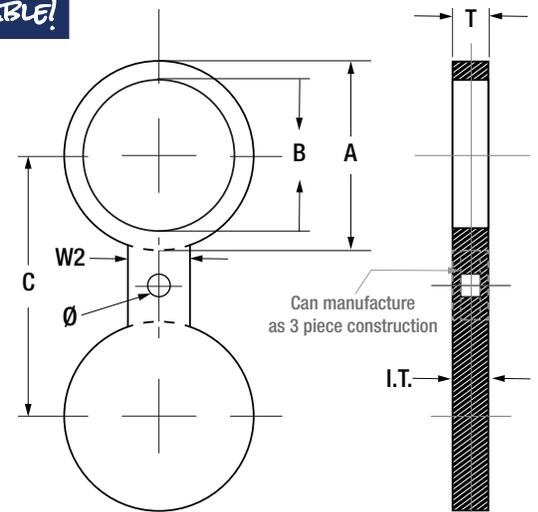

When Ordering Specify:

- Size
- Flange Rating
- Mill or Serrated Face
- Thickness (Isolation, Hydro or custom)
- Handle Type (Paddle Blinds only)
- Material
- Quantity
- Delivery Date

SPECTACLE / FIGURE-8 BLINDS

- Sizes 1/2" — 96"

METHODOLOGY

Line sizes up to 96" are available. Standard Isolation thickness is 5/16" (+/-1/16). Any thickness rating or alloy is available upon request.

Sizes and thicknesses meet the following specifications ASME 16.48, ASME 16.5, ASME B16.47

Blank thicknesses over 24 NPS were calculated using the equation for blanks in ASME B31.3 as follows:

$$T = d \sqrt{(3P) / (16SE)}$$

d = I.D. of ring gasket (in.)
 T = Blank Thickness (in.)
 S = 23,300psi
 E = 1.00
 P = Design Gauge Pressure psi.

S (Basic Allowable Stress) and E (Quality Factor) values were determined from tables A1 and A1-A from B31.3 for 516-Gr 70 material with the temperature range of -20 to 100° Fahrenheit. This calculation does not take into consideration any required corrosion allowance if needed.

Special Handle
Designating Vent

EZ VENT® SLIP BLINDS

- The EZ Vent slip blind is used to block one side of your flange while allowing access to vent the other side
- Excellent for use when there is not a valve on your piping at that location
- The vent is commonly used to verify there is zero energy in the line; vent off any pressure that has leaked by upstream valve; as an entry point for hydrotesting
 - Sizes: 1/2" to 96"
 - Available as a spectacle or paddle blind
 - Can be rated (with additional thickness for vent)
 - Port options: NPT or SW
 - Multiple ports can be added; venting one or both sides
 - Stocked metals: 516 - Gr70 carbon steel and 304/316 stainless steels; can supply any alloy
 - Finish options: Mill or Serrated (125 / 250 RMS)
 - Face options: Flat or RTJ Male or Female with Oval or Octagonal gasket types
 - Each EZ Vent blind is stamped with the line size and flange rating; carbon steel has color coded handles for easy rating identification
 - Can be made to your customized specifications

- # of Ports
- Location of NPT or SW ports
- Material
- Quantity
- Delivery Date

Machine Finish may require increased thickness.

EZ PURGE® SLIP BLINDS

Special Handle
Designating
Purge
Blind

In line purging applications, the traditional method typically involves using a slip blind along with multiple spacers placed between the blind and the gapped flange. While this approach can create a purging area, it presents several potential issues that could lead to unsafe practices or equipment damage.

USA Industries' **EZ Purge** blinds are designed to resolve these challenges. Our purge blinds are

clearly identifiable and can be customized to meet any specific requirements. The standard model features a 1/2" thick isolation slip blind with a 1/4" deep channel, with custom thicknesses available upon request.

The gasket area is approximately 50% of the purge area, ensuring proper distribution of sealing force. We also offer custom configurations to accommodate your unique purge flow needs.

- Sizes: 1/2" - 96"
- Flange Rating Classes: 150#, 300#, 600#, 900#, 1500#, 2500#
- Standard blind is 1/2" thick with a 1/4" deep channel, available in widths of 3/4", 1", or 1 1/2", depending on the size of the blind
- Stocked metals: 516 - Gr70 carbon steel and 304/316 stainless steels; can supply any alloy
- Carbon steel blinds are painted black with a color coded handle to easily identify flange rating, and labeled with size and rating for quick identification
- Can be made in RTJ
- Q/A & Q/C — manufactured under our ISO 9001: 2015 Quality Assurance Program

When Ordering Specify:

- Size
- Flange Rating
- Mill or Serrated Face
- Material
- Quantity
- Delivery Date

EZ VENT-PURGE BLIND®

Our EZ Vent-Purge Blind combines the benefits of BOTH the EZ Purge® and EZ Vent® slip blinds as shown on page PI-8.

- Sizes: 1/2" - 96"
- Flange Pressure Rating Classes: 150#, 300#, 600#, 900#, 1500#, 2500#
- Standard blind is 1/2" thick with a 1/4" deep channel, available in widths of 3/4", 1", or 1 1/2", depending on the size of the blind
- Stocked metals: 516 - Gr70 carbon steel and 304/316 stainless steels; can supply any alloy
- Carbon steel blinds are painted black with a color coded handle to easily identify flange rating, and stamped with size and rating
- Can be made in RTJ
- Q/A & Q/C — manufactured under our ISO 9001: 2015 Quality Assurance Program

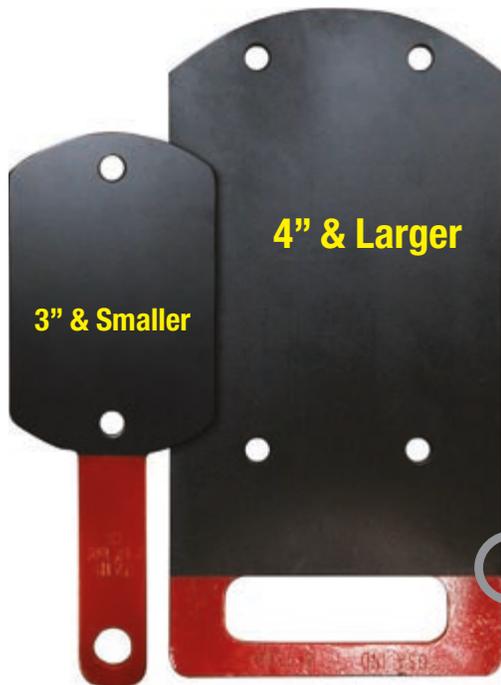

Special Handle Designating
EZ Vent-Purge Slip Blind

When Ordering Specify:

- Size
- Flange Rating
- Thickness (Isolation, Hydro or custom)
- Mill or Serrated Face
- # of Ports
- NPT or SW Port(s) Location(s)
- Material
- Quantity
- Delivery Date

EZ GUILLOTINE™ SLIP BLINDS

Guillotine Blinds are used to provide an isolation source on the flare header side of a PSV prior to removal of the PSV for repair.

A blind flange is then placed over and bolted using remaining bolt holes to ensure pressure holding capabilities.

Available in Carbon Steel and Stainless Steel or other alloys to meet your specifications

HANDLE COLORS					
150#	RED	300#	BLUE	600#	YELLOW
900#	GREEN	1500#	WHITE	2500#	ORANGE

When Ordering Specify:

- Size
- Flange Rating
- Thickness
- Color coded handle*
- Material
- Quantity
- Delivery Date

BLIND FLANGES

Blind Flanges meet SA105 (carbon steel) specifications.

- Options for Raised Face, Flat Face, and Ring Type Joint (RTJ) faces
- Stocked in 516 - Gr70 carbon steel and 304/316 stainless steels; can supply any alloy
- Coatings available: galvanized, zinc plated, and yellow zinc chromate
- Vent or port connection options: Socket Weld and NPT
- Meets ASME B16.47 & B16.48/ANSI B16.5 and B16.2 specs
- Custom high pressure flanges made to your specs
- Other blind specifications A182, A350, B160, etc. can be provided upon request for purchase

GRIPSAFE[®] ST

The most significant innovation in pipe isolation and testing technology in over 65 years!

APPLICATIONS INCLUDE:

- Pipe Testing • Flange Weld Testing • Pipe Spool Testing • Line Purging • Isolation
- Positive Isolation Monitoring • Pre/Post Weld Operations

EASY HYDRAULIC INSTALLATION • ASME PCC-2 COMPLIANT • SR MODEL RATED UP TO 7000 PSIG • NO TUBE SHEET DAMAGE OR WELDING REQUIRED

INTRODUCING

GRIPSAFE[®] ST

For over sixty years, industries have relied on conventional isolation and testing plug technology despite known incidents of ejections and plug movements. USA Industries now introduces its GripSafe ST line, revolutionizing plug technology with cutting-edge advancements. The GripSafe ST plugs boast a patented independent wedge gripping system, ensuring unparalleled holding strength while minimizing risks to personnel and equipment. This innovative redesign of traditional plug designs positions the GripSafe ST line as the global standard for safety, reliability, and technological sophistication.

SUPER OR
TECHNOLOGY

GRIPSAFE[®] ST INNOVATION

Manufactured Exclusively by USA Industries an ISO 9001:2015 Certified Company

For the latest patent and trademark information, go to:

WARNING:

A SPECIAL WORD OF CAUTION: Pressure testing can be an extremely hazardous operation and safety precautions should be strictly adhered to.

All connections, valves, flanges and other fittings should be checked for suitability to test pressure. Verify the line ID & Plug Range match. Most importantly — Never stand or pass in front of any test plug or other enclosure while test is in progress. If plug discharges during a test, serious injury or death could occur.

GRIPSAFE[®] ST FAMILY OF ISOLATION & TEST PLUGS

KEY FEATURES & BENEFITS

1 WORLDS MOST ADVANCED ENGINEERED PIPE PLUG

■ Patented Technology Supercedes Old Fashioned Design Used For The Past 65+ Years*

- US & International Patents - 14
- US & International Trademarks - 7
- Other US and Foreign Patents Pending

■ 7 Years of Research & Development With In-House Engineering

- Over 4000 Load & Pressure Tests
- 67 Years of Professional Industrial Design Team Engineering Experience

■ Proven Field Success Since 2017

■ Confident GripSafe ST Will Be the New Industry Standard

*Patent No. 2,855,003 - October 7, 1958; Ellis B. Thaxton

■ Design Validation Testing

- 2017 - present
- 80 unique test plans conducted on various stocked sizes and schedules, equating to 1000's of repeatable tests

2 INDEPENDENTLY ACTUATING WEDGE SYSTEM

Competitive Products

■ Equal Loading Across All Wedges Ensures Optimal Surface Contact & Holding Capabilities

■ Overcomes Ovality (out-of-round pipe)

- Wedges self adjust to find pipe wall

■ Superior Self Gripping

- As force increases, the wedge's hold becomes stronger against the pipe wall

■ No Damaging Pressure Points

- Force is distributed across entire wedge surface

■ Automatic Gripping Upon Insertion On 2-Out-Of-3 Plug Models

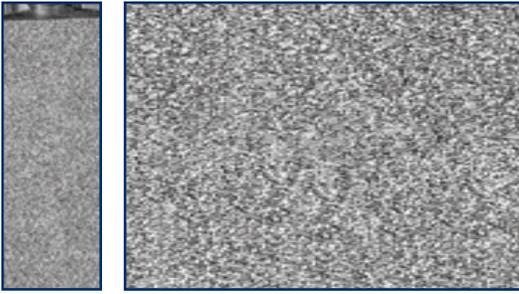

**SUPERIOR
TECHNOLOGY**

3 GRIPPING WEDGES

GripSafe ST uses a specially designed wedge system that grips the pipe, and leaves virtually no scarring on the surface.

GripSafe ST

Competitive products that use serrated jaw-like grippers must bite into the pipe wall in order to hold the load. Feasibly, this degrades the pipe's integrity. Additional costs and time to rework, or to add temporary piping to compensate for damages during testing results.

Competitor A

Competitor B

■ **Secure Gripping With Proprietary Gritlock® Technology**

- Thousands of microscopic points of surface contact
- Highly dense and durable material
- At most, micro indentations are left behind
- Perform thousands of full hydro test cycles without diminished performance

■ **Leaves Pipe With Virtually No Surface Damage**

■ **Non-Contaminating Coating**

- Wedges are compatible with any alloy piping*

**After use in carbon steel pipe, eliminate the chance for carbon remnants being passed on in passivated/clean stainless steel pipe by simply changing wedges or by using another GSST plug not previously introduced to carbon steel pipe.

COMPETITIVE WEDGE TESTING

TEST SPECS: SCH 80 PLUGS, ASTM A106 GRADE B STEEL PIPE, PRESSURIZED TO 3,246PSI (FULL HYDROTEST PRESSURE)

4 TRI-PLY® SEALS

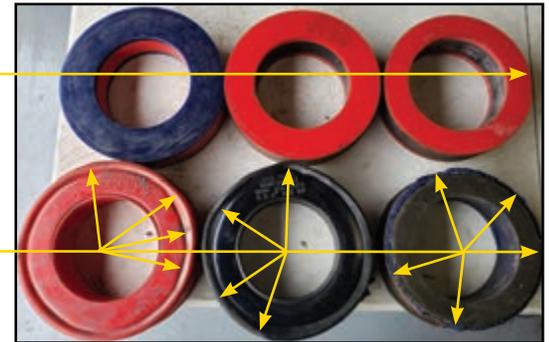

■ **Patented Proprietary Seal Technology**

- Reduces seal creep
- Less torque required to seal
- Proprietary urethane blend maximizes sealing ability
- Wider seal area over competitive designs
- Expansion range up to 3/8" for greater sealing capacity
- Longer seal life

TRI-PLY VS. TRADITIONAL URETHANE SEAL TESTS

• *Tri-Ply seals maintain their shape* when pushed beyond testing limits

• *Traditional urethane seals deform and flatten out* when pushed beyond testing limits. The flattening point is when seal expansion seizes, leaving the plug at higher risk for ejection at high pressures

5 ALUMINUM & STAINLESS STEEL BODY MATERIALS

■ **Less Weight (10" and larger plugs)**

- On average GripSafe ST plugs weigh less than competitive products. Significant weight differences exist as plug sizes increase, reaching upwards of **50% weight reductions**.

DOUBLE BLOCK AND BLEED (DBB) 3/4" TO 36"*

RENTALS
AVAILABLE!

SAFETY & RELIABILITY

Instant Security. With its exclusive patented design, GripSafe ST features an advanced self-gripping technology that mitigates the chance of plug ejection immediately upon insertion into the pipe, even before nuts are tightened.

Superior Self-Gripping Performance. The innovative system distributes equal loading across the gripping wedges ensuring maximum surface contact and holding capabilities. As pressure increases behind the plug, the wedges grip tighter. Even in pipe diameters that are asymmetrical, each wedge independently adapts to variances within the pipe. Coupled with its automatic gripping feature upon installation, GripSafe ST takes "self-gripping" to a new level.

Lightweight Advantage. GripSafe ST plugs weigh less on average than competitive products. Significant weight differences exist as plug sizes increase, reaching upwards of 50% weight reductions in larger sizes without sacrificing holding capabilities.

Leaves Virtually No Surface Damage. Unlike competitive products which rely on serrated jaws to bite into the pipe for holding purposes, GripSafe ST uses a specially designed wedge system that grips the pipe, while leaving virtually no surface scarring. GripSafe ST eliminates the need for a segment of sacrificial pipe, or the cleanup necessary to remove surface deformations other tools create.

Non-Contaminating Solution. GripSafe ST plugs utilize a proprietary texture on the gripping wedges that can be used on any metal type with no carbon contamination. Therefore, in contrast with other plugs, GripSafe ST requires no alternate parts for use in stainless and other alloy pipes where cross contamination is a concern.

APPLICATIONS

Flange Weld Testing. Pressure can be placed between the two seals to test weld-neck flanges by means of hydrostatic pressure, checking for hoop stress failure, weld leaks and/or pinhole leak paths while providing protection from any unexpected pressure discharge.

Pre/Post Weld Operations. Dual port design provides enhanced cooling by circulating water between the seals during pre/post weld processes (*on 6"+ models*).

Isolation. Increase safety by preventing exposure to hydrocarbon or other process leaks. Mitigate risk of injury to personnel in the event of inadvertent valve openings, valve leaks, or other pressure equipment failures upstream.

Positive Isolation Monitoring. Pressure between the two seals verifies seal integrity and ensures the plug's seals are effectively isolating the pipe.

Line Purging. Feed inert gases through the vent pipe, into a vessel, for back-purging welds or to remove oxygen for other processes.

OUTBOARD RETRACTION BLOCKING (ORB) 3/4" TO 36"*

SAFETY & RELIABILITY

Instant Security. With its exclusive patented design, GripSafe ST features an advanced self-gripping technology that mitigates the chance of plug ejection immediately upon insertion into the pipe, even before nuts are tightened.

Superior Self Gripping Performance. The innovative system distributes equal loading across the gripping wedges ensuring maximum surface contact and holding capabilities. As pressure increases behind the plug, the wedges grip tighter. Even in pipe diameters that are asymmetrical, each wedge independently adapts to variances within the pipe. Coupled with its automatic gripping feature upon installation, GripSafe ST takes "self-gripping" to a new level.

Lightweight Advantage. GripSafe ST plugs weigh less on average than competitive products. Significant weight differences exist as plug sizes increase, reaching upwards of 50% weight reductions in larger sizes without sacrificing holding capabilities.

Leaves Virtually No Surface Damage. Unlike competitive products which rely on serrated jaws to bite into the pipe for holding purposes, GripSafe ST uses a specially designed wedge system that grips the pipe, while leaving virtually no surface scarring. GripSafe ST eliminates the need for a segment of sacrificial pipe, or the cleanup necessary to remove surface deformations other tools create.

Non-Contaminating Solution. GripSafe ST plugs utilize a proprietary texture on the gripping wedges that can be used on any metal type with no carbon contamination. Therefore, in contrast with other plugs, GripSafe ST requires no alternate parts for use in stainless and other alloy pipes where cross contamination is a concern.

APPLICATIONS

Pipe Testing. Test pipe sections without the need for flanges.

Pipe Spool Testing. Perform hydrostatic testing of pipe spools, eliminating the need for end caps and welding.

Isolation. Increase safety by preventing exposure to hydrocarbon or other process leaks. Mitigate risk of injury to personnel in the event of inadvertent valve openings, valve leaks, or other pressure equipment failures upstream.

Line Purging. Feed inert gases through the vent pipe, into a vessel, for back-purging welds or to remove oxygen for other processes.

Note: For 4" NPS, Pipe Schedules 120, 160, and XX require the smaller plug configuration.

* Larger sizes and custom configurations available upon request

INBOARD INSERTION BLOCKING (IIB) REVERSE PRESSURE 3/4" TO 24"*

RENTALS
AVAILABLE!

SAFETY & RELIABILITY

Unmatched Security. With its exclusive patented design, GripSafe ST features an advanced self-gripping technology that mitigates the risk of plug movement downstream upon installation.

Superior Self Gripping Performance. The innovative system distributes equal loading across the gripping wedges ensuring maximum surface contact and holding capabilities. As pressure increases in front of the plug, the wedges grip tighter. Even in pipe diameters that are asymmetrical, each wedge independently adapts to variances within the pipe. GripSafe ST takes "self-gripping" to a new level.

Leaves Virtually No Surface Damage. Unlike competitive products which rely on serrated jaws to bite into the pipe for holding purposes, GripSafe ST uses a specially designed wedge system that grips the pipe, while leaving virtually no surface scarring. GripSafe ST eliminates the need for a segment of sacrificial pipe, or the cleanup necessary to remove surface deformations other tools create.

Non-Contaminating Solution. GripSafe ST plugs utilize a proprietary texture on the gripping wedges that can be used on any metal type with no carbon contamination. Therefore, in contrast with other plugs, GripSafe ST requires no alternate parts for use in stainless and other alloy pipes where cross contamination is a concern.

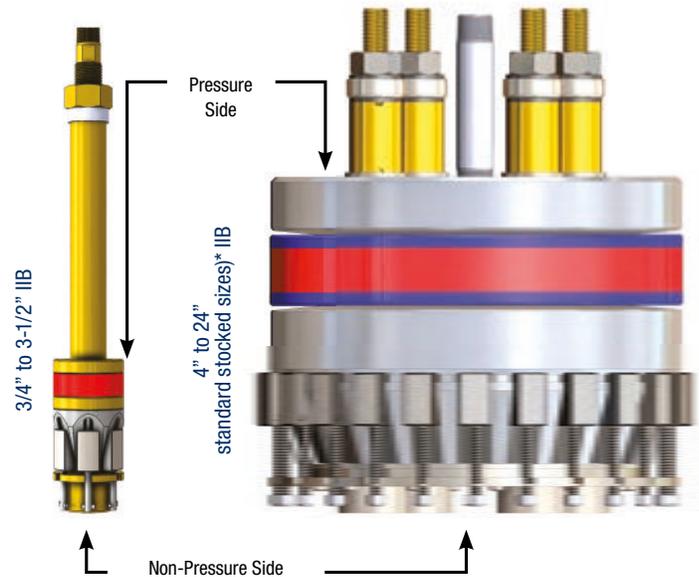

Lightweight Advantage. GripSafe ST plugs weigh less on average than competitive products. Significant weight differences exist as plug sizes increase, reaching upwards of 50% weight reductions in larger sizes without sacrificing holding capabilities.

APPLICATIONS

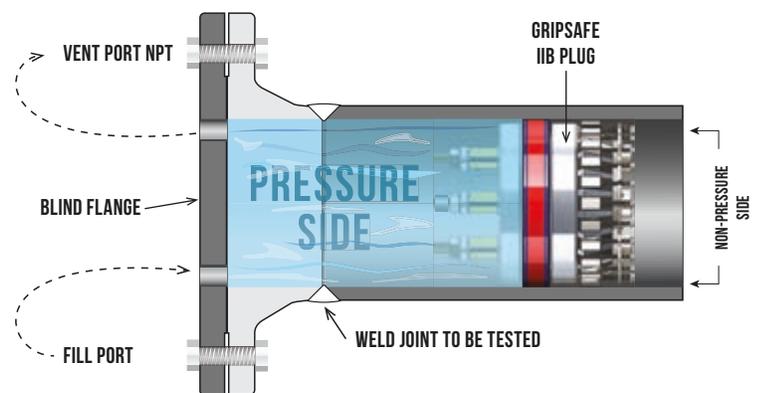

Flange Weld Testing. Used in conjunction with a ported blind flange, GripSafe ST IIB plugs stress the weld joint in longitudinal (axial), circumferential (hoop) and radial pressures identical to the stresses that would be induced when hydro-testing the entire piping system, making them superior to traditional flange test plugs (FTP) which apply hoop and radial stresses only.

Pressure Vessels. Block outlet piping in vessels to pressurize for cleaning or testing purposes.

FLANGE WELD TEST PLUGS

*Clear, Purge, Weld
and Test With Our Superior
Flange Weld Test Plugs*

Waste disposal is reduced to just a few gallons of water at most.

LARGEST RENTAL FLEET AVAILABLE

Insert the plug into the pipe to be welded, bolt the flanges together and tighten the large compression nut(s) to expand the seal — ***It's that Simple!***

The flange to pipe weld is ready to be tested. A complete test requires a minimum amount of water — from a few cups to a few gallons, depending on the line size — ***virtually eliminating your hazardous waste disposal costs.***

- Fast, safe and easy installation and testing
- Reduces testing, downtime, and waste disposal costs
- Stocked Line Sizes from 3/4" to 24"
- Flange ratings: 150# - 2500#
- Available in Raised-Face or Ring Type Joint Flanges
- Seals — **NEW CHEMISTRY** — easier to seal against Pitted Pipes — color coded for line schedule
- Seal and compression ring sets are easily changed to accommodate different pipe schedules - segmented compression tube allows adjustment of seal installation depth
- Testing pressures meeting ANSI B16.5 requirements
- Rugged, heavy duty construction
- Q/A & Q/C — manufactured under our strict ISO 9001:2015 Quality Assurance Program

WARNING:

A SPECIAL WORD OF CAUTION: Pressure testing can be an extremely hazardous operation and safety precautions should be strictly adhered to.

All connections, valves, flanges and other fittings should be checked for suitability to test pressure. Verify the line ID & Plug Range match. Most importantly — Never stand or pass in front of any test plug or other enclosure while test is in progress. If plug discharges during a test, serious injury or death could occur.

NON-GRIPPING DOUBLE BLOCK AND BLEED

**ONE PLUG,
TWO FUNCTIONS!**

Line Sizes 4" & Smaller

Line Sizes 6" & Larger

USA Industries' **Non-Gripping Double Block & Bleed** plug will leave no damage to the interior pipe walls, and features two independent sealing areas, ensuring secure isolation of your internal piping for safe maintenance and repairs. A vent between the seals allows for verification of seal integrity and enables pressure testing of welds by positioning them between the two seals. Pressure testing uses less than a gallon of water, enabling the use of a hand pump, thereby reducing fill times, waste and treatment expenses. Additionally, these plugs can be customized with extended reach to accommodate specific piping requirements. The plugs are highly portable and is easy to position.

- Sizes: 3/4" to 24" NPS; larger sizes are available upon request
- Working pressures up to 2,500 PSI (172.4 Bar) between the seals
- Seal material: Urethane
- Lightweight aluminum/steel body construction
- Will reduce time and costs to repair and test welds
- Minimizes purge costs and associated waste
- Safety factor reduces non-destructive evaluation (NDE)
- Monitor the isolation zone and upstream pressure to prevent backpressure during test

WARNING:

(See page PI-18 for important details)

HEAVY DUTY INDUSTRIAL ISOLATION PLUGS

Provides Rugged, Simple and Safe Isolation

The **Heavy Duty Industrial Isolation Plugs** are maintenance free. The unique seals are capable of expansions exceeding 1" with minimal torque. To use, simply install into the open end of the pipe or tube and tighten the compression nut(s) to expand the seal element.

- Available in Standard, Extended Insertion, or Double Block configurations
- Heavy-Duty Construction — corrosion resistant finish — stainless steel parts available
- Urethane seals — **New Chemistry** — easier to seal against pitted pipes — color coded for line schedule
- Can be provided for any pipe size
- Manufactured under our strict ISO 9001:2015 Quality Assurance Program

8" & Smaller

10" & Larger

MEDIUM DUTY INFLATABLE PIPE BALLOON PLUGS

When Ordering Specify:

- Size
- Quantity
- Rental or Purchase
- Delivery Date

The **Medium Duty Inflatable Pipe Balloon Plugs**, manufactured in the USA, are designed for high-expansion applications. These plugs effectively isolate piping ranging from 2" to 96" in diameter. Constructed with Nitrile Reinforced Ballistic Nylon, they offer hydrocarbon resistance and can withstand limited backpressure, setting them apart from standard inflatable plugs. Their synthetic materials provide a longer shelf life compared to molded rubber alternatives.

LOW PRESSURE INFLATABLE PIPE BALLOON PLUGS

Inflatable Pipe Balloon Plugs are for isolating piping in sizes 1.5" through 66." Special plugs can be provided with flow-through vents so upstream back pressure can be vented. Plug Includes 2 ft hose and pressure gauge. Custom length hose provided upon request.

WARNING:
(See page PI-18 for important details)

WING NUT ISOLATION PLUGS

To quickly and easily seal your pipe, tube or hole, USA Industries' Wing Nut Plumber's Type Isolation Plug is just what you're looking for. These plugs use neoprene seals with die cast bodies, and are available in line sizes 2" through 24". This plug is rated to hold back pressure up to 13 PSIG and is available with or without upstream venting capabilities.

When Ordering Specify:

- Size
- Pipe Schedule
- Quantity
- Rental or Purchase
- Delivery Date

"FOREMAN" ISOLATION PLUGS

Single bolt low pressure Isolation Type Plugs — These plugs use Neoprene seals with aluminum die cast bodies and are available in line sizes from 4" through 48". Available with or without upstream venting capabilities.

We strive to provide our customers with exceptional USA manufacturing quality products, economically that adhere to our ISO 9001:2015 Quality Program.

CUSTOM ENGINEERED ISOLATION PLUG ACCESSORIES

Custom 34" Non-Gripping DBB

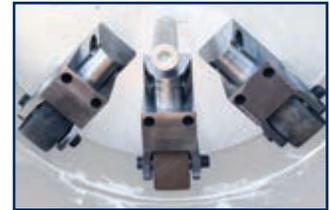

EZ Turn Hydraulic Actuator Cylinders™

Synchronous hydraulic tightening and loosening of seal expansion nuts, which in turn expands and contracts the plug seals. No manual intervention is required, equaling a dramatic time and labor cost savings to you and your project budget.

EZ Slide Heavy Duty Mounted Casters™

Castors provide fluid movement of oversized and heavy weighted isolation plug inside the pipe. Consequently, the castors require very little physical exertion to position or reposition pipe plug once seated in the pipe.

EZ Align Fit-up Clamp™

Clamp latches onto 3rd party device in order to slide the oversized and heavy weighted isolation plug into place over short and long distances.

Internally Mounted Digital Camera with Lighting

Internally mounted camera allows you perfectly locate weld-seam. There is no more guessing, or requiring you to measure short and long distances in order to seat the plug properly in place before beginning your project operation.

Ultra-wide Tri-Ply® Seals

The patented multi-durometer Tri-Ply Seal provides a larger surface coverage area over the standard seal, resulting in a greater expansion range, and eliminates seal mushrooming that happens from over torquing the seal expansion nuts.

We strive to provide our customers with exceptional USA manufacturing quality products, economically that adhere to our ISO 9001:2015 Quality Program.

BLEED RINGS | DRIP RINGS | VENT RINGS

- Standard Sizes: 1/2" to 14" (custom sizes available)
- Customizable! Material, size, tap connections and sizes, gasket types, # of ports
- Meets ASME/ANSI standards for: B16.5 and B16.20 for raised face and ring type joint (RTJ) dimensions and tolerances
- Standard materials: Carbon Steel (516-Gr70 & A105/LF-2) and Stainless Steel (304 & 316)
- Choose between 1/2" or 3/4" threaded (NPT) or socket-weld (SW) connections as well as raised-face (125-250 RMS) or ring type joint (RTJ) configurations (male or female)
 - Standard Ring Joints (RJ) feature female oval ring grooves (male joints are available upon request)
 - Carbon steel plate products receive one coat of black lacquer as standard, unless alternative specifications are provided

RTJ Bleed Rings Available

BLEEDER CLEANER

Available in Four Shaft Types

*** USA Industries' Bleeder Cleaners are the only ones on the market with a bi-directional cable that will not unwind if turned counter-clockwise.**

Bleeder Cleaners (aka rod-out device, orifice tap cleaner or tap reamer) allow clogged bleed, drain, vent and instrument tap valves to be cleaned during normal operations **SAFELY** and **EFFICIENTLY** while completely containing the product. Properly using our tool eliminates the possibility of dangerous product releases which can result in your personnel and others being exposed to unsafe and hazardous conditions. Our Bleeder Cleaners are rated up to 1,000° F and 1,000 PSIG and are available in four model types. If required, can be made to hold higher pressure.

Simple to use: 1. Screw the end connector onto the item needing cleaning. 2. Close the bleed valve. 3. Open the process valve. 4. Insert the shaft while rotating the handle. 5. After the line has been fully cleared, back out the shaft. 6. Close the process valve. 7. Open the bleed valve and disconnect the tool... **SAFELY CLEANED LINE!**

- When Ordering Specify:**
- Length of Shaft (standard length is 14")
 - Shaft Type (Straight , 90, 135 or Flexible shaft)
 - Drill Bit Size
 - Coupling Size
 - Quantity
 - Delivery Date

Available Bit Types

All components supplied conform to ANSI, ASME, ASTM Standards for Dimensions. Manufactured under our ISO 9001:2015 Quality Assurance Program.

PADDLE BLIND & BLIND FLANGE RACK STORAGE REVOLUTIONS!

USA INDUSTRIES PIPE SCHEDULE CHART

Our patented, groundbreaking designs deliver unparalleled worker safety, asset protection, security, organization, and inventory management.

800-456-8721 | sales@USAIndustries.com

RENT OR BUY FROM THE INDUSTRY LEADER IN PADDLE BLIND AND
BLIND FLANGE RACK STORAGE SOLUTIONS!

EZ LOCK BLIND RACK®

Patented EZ Lock Blind Rack^[1] for Storage of Paddle / Hydrotest Blinds

(Patent No. 9,546,889)

January 17, 2017

Blinds are secured by our patented, and innovative Indexing Retainers.

[1] Tracy Sue and Casey Sue, "Lock rack for hydro, isolation or test blinds..."

- Weight accommodation: 12,000 lbs.
 - Storage capacity: up to 884 blinds*
 - Accommodates "7" or "T" handles
 - Holds blinds up to 24-1/4" OD
 - Lockable lid security to reduce theft and blind loss
 - Patented Indexing Retainers for safety and blind security
 - Easily accessed from both sides of the unit
 - Overhead heavy lift crane lugs
 - Bottom accessible forklift cavities
 - Order fully stocked and receive discount
- * = 884 blinds is dependent on blind sizes & thicknesses

ON-SITE & REMOTE MANAGED INVENTORY SERVICES

USA Industries offers customized onsite and remote **Inventory Management Services** that enhance operations, cut costs, and allow businesses to focus on building, repairing, and maintaining their facilities.

Partnering with USA Industries for third-party inventory management allows you to streamline operations, focus on project goals, and enhance overall value. Our expertise ensures your project runs efficiently.

Onsite Managed Inventory Service Cost Savings

Boosting Operational Efficiency

Our managed service ensures real-time inventory tracking, optimized stock levels, and enhanced accuracy, preventing stockouts and overstocking for seamless operations and reliable product availability.

Cost Savings and Flexibility

Outsourcing inventory management to USA Industries cuts warehousing, staffing, and technology costs while offering a scalable, cost-effective solution tailored to your needs.

Focus on Core Business Functions

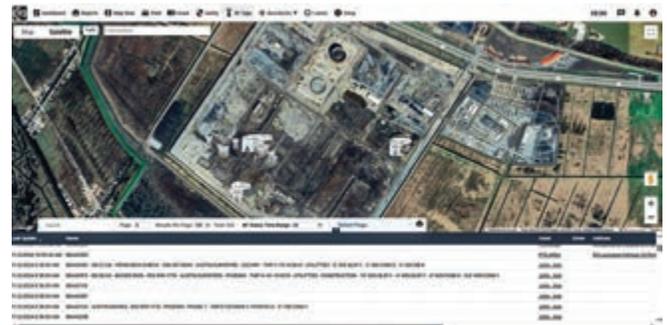

Outsource inventory management to USA Industries, freeing your team to focus on facility maintenance during turnarounds, shutdowns, repairs, and construction.

Scalability for Future Growth

As your business grows, USA Industries ensures seamless inventory scaling, handling increased volumes for smooth transitions and sustained progress without in-house management challenges.

We Track Your Assets to Prevent Costly Losses!

ORIFICE PLATES

We specialize in Orifice Plates
ANY SIZE - ANY MATERIAL - ANY THICKNESS

USA Industries manufactures each plate to meet or exceed *A.G.A., I.S.A., A.N.S.I., A.S.M.E.* and *A.P.I.* standards and recommendations.

Stocked plates include 304 & 316 stainless steel in 1/8" and 1/4" thicknesses. Other materials and / or thicknesses are available upon request.

We typically bore plates to the customer's supplied sizing calculation, however, for an additional fee we can provide sizing calculation services to you.

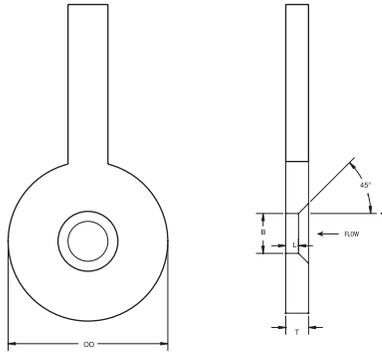

- **Series 500 Universal Plates** - for orifice fittings
- **Series 520 Paddle Plates** - for raised face flanges
- **Series 560 & 590 Plates** - Ring Type Joint Plates with male or female gasket area
- We also provide **Orifice Flanges** in both carbon and stainless steel, as well as orifice plate holder assemblies
- **Restriction Orifice Unions** from 1/4" to 2" in socket-weld or female NPT threads

**IN-STOCK ITEMS
SHIP SAME DAY**

www.USAIndustries.com

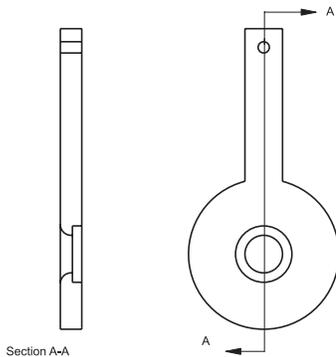

*Concentric Bore

Used primarily for clean liquids, gases, or vapors that are relatively non-viscous. When necessary, a bevel is machined at a 45 degree angle to attain the proper edge thickness. Accuracy range at +.6% for beta ratio between 0.2 to 0.75.

Eccentric Bore

Primarily used for measurement of entrained solids or slurries of vapors and gases where condensation is present. The eccentric bore is offset to where the bore edge is inscribed in a circle that is 98% of line I.D. Accuracy range at +1.5% to +2% for beta ratio between 0.3 to 0.75.

Quadrant Bore

This type of orifice bore is used primarily in the measurement of high viscosity flow, such as heavy crude, syrups, and slurries. The radius on the inlet side is equal to the plate thickness. The quadrant is always recommended where the Reynolds number factor is less than 100,000. Accuracy range is +2% for beta ratio between 0.24 to 0.6.

Segmental Bore

The segmental bore is located in the same way that the eccentric bore is. These bores are used primarily for slurries or extremely dirty gases where the flow may contain impurities heavier than fluid. Accuracy range at +2% for beta ratio between 0.35 to 0.75.

**Plate Bevel determined per Instrument Engineers Handbook, Edition 3: Bela Lipták. All plates thicker than 1/8" should be beveled 45 degrees on the downstream side to a 1/8" edge thickness. Any orifice bore less than 1" to be beveled to 1/16" if plate thickness is 1/8".*

Orifice Plate Installation

1. Install orifice plate and new gaskets between flanges.
2. Release the flanges by turning the two jack bolts counterclockwise.
3. Replace studs and tighten to spec.

Orifice Plate Removal

1. Loosen all studs and remove the top half of the studs.
2. Spread flanges apart by turning the jack bolts clockwise.
3. Remove orifice plate for inspection or replacement.

When Installing Orifice Plates

1. Orifice Bore must be centered within 3% of inside pipe diameter.

**Note: Writing on the Orifice Plate
ALWAYS faces upstream**

2. Inside diameter of gaskets must not protrude beyond inside surface of pipe.*
3. Tighten flange bolts evenly to prevent plate buckling.

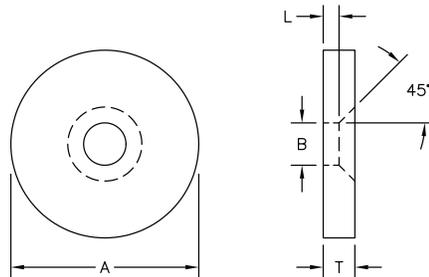

*Gaskets should be replaced at each orifice plate inspection.

SERIES 500 UNIVERSAL ORIFICE PLATES

Universal Orifice Plates are Manufactured for use in ALL standard orifice fitting assemblies or Ring Type Joint plate holders. Each plate is carefully manufactured to meet or exceed standards set by *A.G.A., I.S.A., A.N.S.I, A.S.M.E. & A.P.I.* recommendations. Stocked in 304 & 316 stainless steel and available in any material requested, such as monel, hastelloy, copper-nickel, etc. Coatings can also be provided.

L = Thickness for Restriction Applications

We offer Hycar® and Teflon® seal rings / o-rings that fit our universal orifice plates. Request with your next order to have them shipped together.

When Ordering Specify:

- Line Size
- Plate Thickness
- Bore Size
- Bevel / No Bevel
- Material
- Quantity
- Delivery Date

Hycar® is a registered Trademark of Lubrizol Advanced Materials. Teflon® is a registered Trademark of DuPont.

SERIES 520 PADDLE-TYPE PLATES

Paddle-Type orifice plates are manufactured for use with Raised Face Orifice Flanges and Holding Blocks. Each plate is carefully manufactured to meet or exceed standards set by *A.G.A., I.S.A., A.N.S.I., A.S.M.E. and A.P.I.* recommendations. Stocked in 304 & 316 stainless steel and available in any material requested, such as monel, hastelloy, copper-nickel, etc. Coatings can also be provided. **Vent or drain available on request.**

RING TYPE JOINT PLATES

Choose from Either Style of Plate to Suit your Particular Needs.

SERIES 560

Series 560 plates are of a one-piece construction. Manufactured in any material requested such as 304 or 316 SS, monel, hastelloy, copper-nickel, etc.

When Ordering Specify:

- Line Size
- Plate Thickness
- Flange Rating
- Material
- Quantity
- Delivery Date

SERIES 590

Series 590 plates are manufactured with hold-down screws and use Universal plates for the orifice bore. The 590 Series should be used where frequent replacement or sizing changes are expected. Manufactured in any material requested such as 304 or 316 SS, monel, hastelloy, copper-nickel, etc.

When Ordering Specify:

- Line Size
- Flange Rating
- API Rating
- Material
- Quantity
- Delivery Date

If Needed:

- Series 500 plate thickness
- Bore Size
- Quantity

Note: 560 Plate Holders 2" - 8" have a standard plate thickness of 1/4"

ORIFICE HOLDING BLOCKS

Meets *A.G.A./A.S.M.E./I.S.A.* flange tap location requirements. Available in 150# *A.N.S.I.* rating in all line sizes, ideal for “lined piping” in caustic service. More economical than using orifice flanges in particular applications. Available in carbon, stainless steel, monel, brass, nickel as well as many other alloys. Coated with Teflon® or Kynar®.

If requested, each orifice flange assembly comes complete with (2) Jackscrews & (2) 1/2” Plugs

RESTRICTION ORIFICE UNIONS

* Not all plate types are available in all sizes.

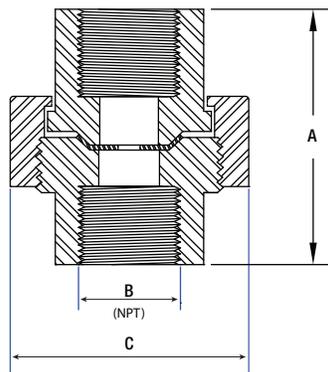

Carbon & stainless steel bodies stocked in pressure ratings of 3,000 psig. Available in line sizes from 1/4" through 2" in both female NPT and Socket-Weld connections. Other sizes and materials available.

Orifices bored to your specifications. All plates are stainless steel and can be ordered separately.

- Available with or without tabbed plate
- Female NPT or Socket-weld Connections
- From 1/4" through 2"
- All recessed plates sealed with a Rubber O-Ring
- Pressed plates are metal to metal sealing

Line Size (in.)	A OAL (in.)	B NPT or SW (in.)	C Hex Size (in.)
1/4	1-3/4	1/4	1-3/8
3/8	1-7/8	3/8	1-5/8
1/2	2	1/2	1-3/4
3/4	2-1/4	3/4	2-3/16
1	2-9/16	1	2-9/16
1-1/4	2-7/8	1-1/4	3-1/6
1-1/2	3-1/8	1-1/2	3-7/16
2	3-1/2	2	4

Founded in Houston, TX in 1982, USA Industries is a leading manufacturer of heat exchanger tools and equipment in the Southern United States. Our inventory covers everything needed to build, repair, replace, test, clean, or plug heat exchangers, condensers, boilers, and air-cooled exchangers.

We back our products with exceptional service — stocked items ship within 2 hours of a phone call, and because most of our customers run 24/7, so do we. For cost-sensitive jobs, our extensive rental fleet offers a practical alternative to purchasing. Look for the Rental Available symbol throughout the catalog or contact our Rental Department directly.

HEAT EXCHANGER, CONDENSER AND BOILER TOOLS

Whether rolling ¼” copper tube or 5” boiler tubes, we have a complete line to suit every application.

We’ve recently made significant improvements to the design and performance of our tube expanders. Our Mandrels and Roll Sets are machined from top-quality tool steel and put through both heat treatment and cryogenic processing — a combination that dramatically extends tool life, reduces wear, and delivers exceptional value at a competitive price.

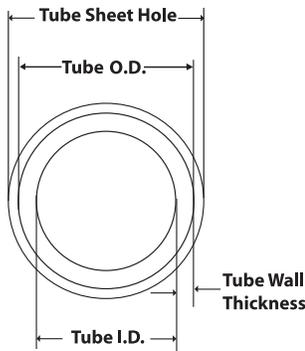

The result is a tougher, longer-lasting tool you can count on.

HEAT EXCHANGER, CONDENSER AND BOILER EXPANDERS

TUBE EXPANDERS - *Tube Expanding Basics*

Tube expanding compresses the tube OD against a tube sheet or boiler drum, reducing the tube wall by a specified percentage to create an effective seal.

TUBE WALL REDUCTION SETUP GUIDE	
Step 1	Measure Tube Sheet Hole
Step 2	Measure Tube OD
Step 3	Calculate Clearance (A-B)
Step 4	Measure Tube ID
Step 5	Calculate Total Tube Wall Thickness (B-D)
Step 6	Calculate 70% Wall Reduction (.07 X E)
Step 7	Calculate Finished Rolled Tube ID (C+D+F)

Note Example is for a 7% tube reduction

Wall Reduction by Material

Material	Wall Reduction	Notes
Carbon Steel	4-5%	Heavy lube; max 150 Brinell
Copper & Cupro Nickel	8-10%	Abrasive; use plenty of lube
Stainless Steel & Titanium	7-8%	Serrated hole; complete in one pass
Admiralty Brass	7-8%	Well lubricated; never exceed 15%
3003/4004 Aluminum	5% max	Do not exceed
6061-T Aluminum	10-12%	

Care & Maintenance

USA Industries expanders are crafted from heat-treated alloy tool steel built for demanding conditions. After every few tubes, clean in solvent, re-oil, and rotate between two or more expanders. Replace worn or chipped parts immediately. Store clean with rust preventive coating or submerged in lightweight oil.

WHY TUBES LEAK

- **Under-rolling** — tube doesn't fully seat. When in doubt, under-roll rather than over-roll.
- **Over-rolling** — distorts ligaments, weakens adjacent tubes, causes premature leaks.
- **Poor prep** — ream and burnish holes .006”–.010” over tube OD (5/8” = .006”, 3/4” = .008”, 1” = .010”). Keep grooves clean when re-tubing.

HEAT EXCHANGER, CONDENSER AND BOILER EXPANDERS

Reversible Thrust Collar Assembly Provided Standard and in All Tube Expanders

COLLAR WITH FLUSH FACE

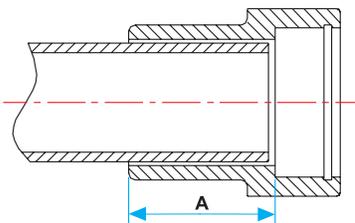

COLLAR WITH FIX RECESS

Nose portion can be 'reversed' to expand tubes flush with tube sheet and also tubes that are projecting 1/8" from tube sheet. This collar is supplied standard on all tube expanders.

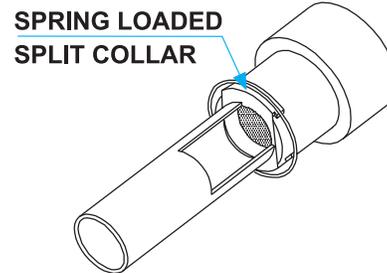

Thin Wall Thrust Collars

FULL RECESS THRUST COLLAR

Used when tubes project varying distances from the tube sheet.

SPRING LOADED SPLIT COLLAR

Has an expandable front nose that expands along with the rolls and eliminates the tube from being sucked into the collar.

Snap It® Engineered Tube Plugs are designed to address the critical needs of the power industry—ensuring safety, reliability and efficiency

For customers with uncommon specifications, USA Industries produces customized plugs to fit their exact material and precise size requirements.

HIGH PRESSURE RATINGS:

Suitable for medium to high-pressure applications — ratings up to 7,000 PSID

COMMON & EXOTIC ALLOYS:

Available in a wide range of materials including stainless steel, carbon steel, brass, titanium and more.

SECURE LEAK-TIGHT SEAL:

Designed with external serrated rings for a helium leak-tight seal, maintaining integrity under extreme thermal and pressure variations.

CONTROLLED HYDRAULIC INSTALLATION:

Hydraulic installation simplifies setup and improves safety with reduced operator fatigue.

ASME PCC-2 COMPLIANCE:

Fully compliant with ASME PCC-2 standards for proven reliability and industry best practices.

"800" SERIES 3-ROLL TUBE EXPANDER

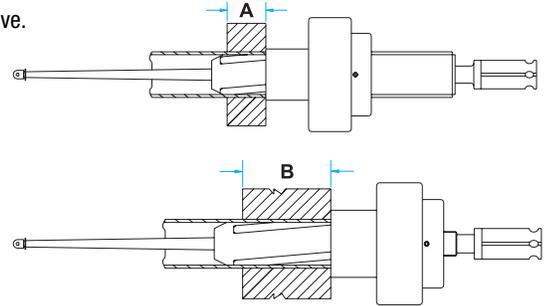

Features

The **800 Series 3-Roll Expander** is the most popular and economical choice for heat exchangers and condensers worldwide. Covers tube sizes 1/2" 14 gauge to 1-1/2" 20 gauge, with roll sets of 1-1/2" or 2-1/4" and adjustable roll depths from 1/2" to 2-1/4".

Models 797-856 use a 3/8" square mandrel drive. Models 857-900 use a 1/2" square mandrel drive.

Tube I.D. Sizes

"800" SERIES 5-ROLL TUBE EXPANDER

Features

The **800 Series 5-Roll Expander** is designed for thin-wall tubes (19–24 gauge) in titanium, stainless steel, Incoloy, and other exotic metals. Covers tube sizes 5/8" 17 gauge to 1-1/2" 24 gauge, with adjustable roll depths of 1/2"–1-1/2" for 1-1/2" rollers and 1-1/4"–2-1/4" for 2-1/4" rollers. Models 815-5 through 858-5 use a 3/8" square mandrel drive. Models 859-5 through 900-5 use a 1/2" square mandrel drive.

Tube I.D. Sizes

"1200" SERIES 3-ROLL TUBE EXPANDER

Features

The 1200 Series 3-Roll Expander is the most versatile option for thick tubesheets, available in four standard reach lengths — and custom lengths up to 60" or longer on request.

Covers tube sizes 1/2" 14 gauge to 1-1/2" 20 gauge, with 1-1/2" or 2-1/4" roll sets.

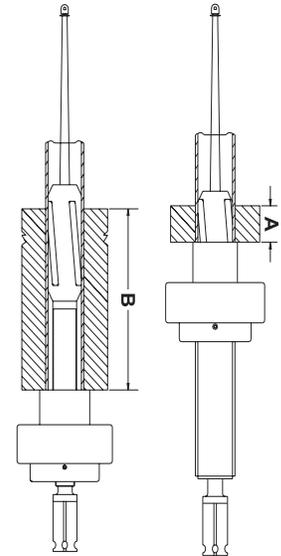

Adjustable Roll Depths		
Reach	1-1/2" Rollers	2-1/4" Rollers
STD	1-1/2" to 6"	2-1/4" to 6-3/4"
A	1-1/2" to 8"	2-1/4" to 8-3/4"
B	1-1/2" to 10"	2-1/4" to 10-3/4"
C	1-1/2" to 12"	2-1/4" to 12-3/4"

Models 1197–1256 use a 3/8" square mandrel drive. Models 1257–1300 use a 1/2" square mandrel drive.

Tube I.D. Sizes
.334" - 1.43" (8.4mm - 36.3mm)

Roller Length		Roll Depth	
		min "A"	max "B"
1-1/2" (38.1mm)	STD Reach	1-1/2" (38.1mm)	6" (152.4mm)
	A Reach	1-1/2" (38.1mm)	8" (203.2mm)
	B Reach	1-1/2" (38.1mm)	10" (253.8mm)
	C Reach	1-1/2" (38.1mm)	12" (304.6mm)
2-1/4" (57.1mm)	STD Reach	2-1/4" (57.1mm)	6-3/4" (171.4mm)
	A Reach	2-1/4" (57.1mm)	8-3/4" (221.1mm)
	B Reach	2-1/4" (57.1mm)	10-3/4" (272.8mm)
	C Reach	2-1/4" (57.1mm)	12-3/4" (323.6mm)

"1200" SERIES 5-ROLL TUBE EXPANDER

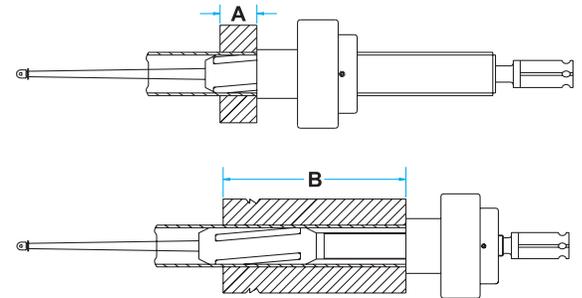

Features

The 1200 Series 5-Roll Expander is designed for thin-wall tubes in thick tubesheets — titanium, stainless steel, Incoloy, and other exotic metals. The 5-roll design delivers more concentric, even expansion than a conventional 3-roll expander.

Covers tube sizes 3/4" 14 gauge to 1-1/2" 20 gauge, with 1-1/2" or 2-1/4" roll sets.

Tube I.D. Sizes
.584" - 1.43" (14.8mm - 36.3mm)

Adjustable Roll Depths		
Reach	1-1/2" Rollers	2-1/4" Rollers
STD	1-1/2" to 6"	2-1/4" to 6-3/4"
A	1-1/2" to 8"	2-1/4" to 8-3/4"
B	1-1/2" to 10"	2-1/4" to 10-3/4"
C	1-1/2" to 12"	2-1/4" to 12-3/4"

Models 1223-5 through 1258-5 use a 3/8" square mandrel drive. Models 1263-5 through 1300-5 use a 1/2" square mandrel drive.

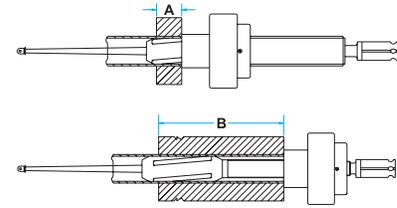

Tube O.D. (in) (mm)	BWG	Tube I.D.		Expander with 1-1/2" (38.1mm) Long Rollers			Expander with 2-1/4" (57.1mm) Long Rollers			Minimum I.D. Tool Enters		Maximum Expansion of Tool

"8012" SERIES TUBE EXPANDER

Features

The 8012 Series is built for large-diameter tubes and thick tubesheets — ideal for air heaters, boilers, and refinery tubes, with tubesheet capacity up to 8".

Covers tube sizes 1-3/4" 8 gauge to 5" 16 gauge.

TUBE I.D. SIZES:	
1.420" - 4.870" (36.1mm - 123.7 mm)	

Adjustable Roll Depths		
Reach	1-1/2" to 6"	2-1/4" to 6-3/4"
STD	1-1/2" to 8"	2-1/4" to 8-3/4"
6"	1-1/2" to 10"	2-1/4" to 10-3/4"
8"	1-1/2" to 12"	2-1/4" to 12-3/4"

ROLLER LENGTH:		ROLL DEPTH:	
		MINIMUM	MAXIMUM
2-1/4" (57.1mm)	STD. REACH	1/2" (12.7mm)	4" (101.4mm)
	- 6" REACH	1/2" (12.7mm)	6" (152.4mm)
	- 8" REACH	1/2" (12.7mm)	8" (203.2mm)

*For Mandrels in 6" & 8" reach - ADD suffix 6 or 8 to Mandrel Model No.

Different Pilots for each I.D.

Features

- Ideal for quick facing of tube ends with the bits easily replaced
- One Tool for each tube OD with pilots provided for the different gauges
- Tool bits coated with Titanium Nitride to give 3 times the life of uncoated HSS bits

**Specify gauge on 3/8" End Facers*

NOTE: Tube End Facers include pilots, except 3/8"

TUBE GUIDES

Features

Tube Guides are designed to protect the tube ends from damage while guiding them thru the tube sheet and baffles. They are lightweight and fit easily into the tube end with a replaceable nylon brush which also cleans the inside of the tube prior to expanding.

- Available for 1/2" thru 3" OD tubes and all Gauges

When Ordering Specify:

- Tube O.D.
- Tube Gauge
- Quantity
- Delivery Date

When Ordering Specify:

- Tube O.D.
- Brush Material Type
- Quantity
- Delivery Date

TUBE END FLARING

Features

- Used to flare tube ends after expanding
- Available for tube sizes from 1/4" - 5" OD

When Ordering Specify:

- Tube O.D.
- Shank Type - 01 or 06
- Shank
- Quantity
- Delivery Date

TUBE ROLLING SYSTEMS PNEUMATIC ROLL MOTORS

Model 720 Series

Features

Torque controlled expansion

Available in the following sizes:

- 550 RPM - Torque 2 to 75 in-lbs - 1/4" Sq Drive
Recommended Max Tube Size - 1/2"
- 1,800 RPM - Torque 2 to 27 in-lbs - 1/4" Sq Drive
Recommended Max Tube Size - 3/8"
- 2,500 RPM - Torque 2 to 75 in-lbs - 1/4" Sq Drive
Recommended Max Tube Size - 1/4"

Model 850 Push/Pull Series

Features

Torque controlled expansion

Available in the following sizes:

- 1,250 RPM - Torque 9.6 to 126 in-lbs - 3/8" Sq Drive
Recommended Tube Size - 3/4"
- 600 RPM - Torque 14.4 to 230 in-lbs - 3/8" Sq Drive
Recommended Tube Size - 1"

Model 1050 Series

Features

Torque controlled expansion

Available in the following sizes:

- 400 RPM - Torque 3.3 to 26.4 ft-lbs - 1/2" Sq Drive
Recommended Tube Size - 1-1/4"

Model 1550 Series

Features

Torque controlled expansion

Available in the following sizes:

- 900 RPM - Torque 4.7 to 30.7 ft-lbs - 1/2" Sq Drive
Recommended Tube Size - 1-1/2"
- 250 RPM - Torque 14.3 to 109.9 ft-lbs - 1/2" Sq Drive
Recommended Tube Size - 2-1/2"

Right Angle Drive Roll Motor

Features

Designed for expanding boiler tubes in steam, mud drums, fire tube & related equipment.

- 190 RPM - Torque 70 to 140 ft-lbs - 5/8" Sq Drive
Recommended Tube Size - 2-1/2"
- 90 RPM - Torque 150 to 305 ft-lbs - 3/4" Sq Drive
Recommended Tube Size - 4"

TESTING EQUIPMENT

VLD 2500 VACUUM LEAK DETECTOR

Pin points leaks in tubes 3/16" to 3" OD

The **VLD-2500 Vacuum Leak Detector** sets the industry standard for locating leaking tubes — fast, reliable, and built to last. Operation is straightforward: seal one end of the suspect tube with a rubber plug or the included T-Handle nozzle, insert the VLD-2500 into the tube, and pull the trigger. Any loss of vacuum indicates a leak. A built-in filter prevents debris from clogging the tool during use.

- Detects leaks in tubes from 1/4" to 3" OD in seconds
- Optional pads extend range to 6" OD
- Runs on standard plant air at 70–100 psi
- Flexible nozzles seat easily onto tubes
- Kit includes detector gun, two nozzles, T-handle, rubber plugs, and carrying case

TESTING EQUIPMENT

VLD 2500 VACUUM LEAK DETECTOR

Pin points leaks in tubes 3/16" to 3" OD

SALES & RENTALS AVAILABLE!

Complete VLD-2500 kit includes:

- Vacuum Leak Detector with carrying case
- Nozzle for 3/16"–1-1/8" ID tubes (other sizes available)
- 12" extension tube
- T-Handle
- Rubber tube plugs (qty 4) — 5/8" 13–24 gauge
- Rubber tube plugs (qty 4) — 3/4" 14–24 gauge
- Rubber tube plugs (qty 4) — 1" 11–24 gauge

Spare Nozzles/Disks		
For Tube ID's	Size	
3/16" - 1/8"	1	Nozzle
1 1/8" - 2"	2	
2 - 3"	3	

VLD-2500 VACUUM LEAK DETECTOR ACCESSORIES		
<p>Rubber Plugs used to plug opposite end of tube being tested. See Chart Sec. 4, page TP-93.</p>	<p>VLD Nozzles - works with VLD and T-Handle for tube sizes:</p> <ul style="list-style-type: none"> • Nozzle for 3/16" to 1-1/8" ID • Nozzle for 1-1/8" to 2" ID • Nozzle for 2" to 3" ID 	<p>T-Handle - for use with Nozzles to plug tube end being tested.</p>

TLD-2500 USA TUBE LEAK DETECTOR PRESSURE GUNS

Features

Insert one gun into the front of the tube and the other into the opposite end to pressurize — if pressure holds, the tube is good; if it drops, the tube is leaking.

- Tests 7–8 tubes per minute
- Covers tube IDs from .310" to 1.2"
- Runs on standard plant air at 70–100 psi
- Silent operation with ergonomic design
- Kit includes pressure & plugging gun, nozzle set, and 3 tube seals of your choice

Additional Tube Seals purchased separately must be used with proper compression tube / nozzle.

JLD-6500 USA VACUUM JOINT LEAK DETECTOR

Features

Tests rolled or welded tube sheet joints by vacuum pressure. Insert the nozzle into the tube, press the gun face against the tube sheet joint, and actuate — if vacuum doesn't hold, there's a leak.

- Tests 7–8 joints per minute
- Covers tube IDs from .310" to 1.21"
- Runs on standard plant air at 70–100 psi
- Silent operation with ergonomic design
- Kit includes detector gun, compression collar set, and 3 tube seals of your choice

Additional Tube Seals purchased separately must be used with proper compression tube / nozzle.

RHINO JR. HYDRAULIC SPEAR TUBE PULLER CAPTAIN AMERICA PULLER — HTPS 1000

Features

A fully self-contained, single-operator tube puller built for years of trouble-free service.

- 10 tons of pulling force — removes stubs or entire tubes fast
- Handles 1/4" to 1" OD tubes of all gauges in tubesheets up to 4" thick
- Includes pulling gun and hydraulic pump — runs on 110VAC
- Optional spring balancer for weightless gun support

RENTALS AVAILABLE!

Consumables include the following:

RHINO JR. PINE JENNY HOLLOW CORE RAM PULLER

Features

A proven, high-capacity puller built for heavy-duty tube removal.

- 30 tons of pulling force — removes stubs or entire tubes
- 6" pull per stroke; up to 12" without resetting using the Double Horseshoe Adaptor
- Handles tubes 1/2" to 3" OD of all gauges in tubesheets up to 8" thick
- Simple to operate, foolproof construction

PINE JENNY HOLLOW CORE RAM, STUB TUGGER ACCESSORIES

SPECIAL NOTE: These items will **REPLACE & INTERCHANGE** with the "Stub Tugger" OR "Pine Jenny" Pullers from other companies

PINE JENNY STYLE TUBE PULLER SPEARS

Features

- Compatible with other manufacturers same style (Pine Jenny, Hollow Core Ram, etc...)
- Manufactured to enhance performance & increase longevity
- Available for 1/2" thru 3" tubes of all gauges

**IN-STOCK ITEMS
SHIP SAME DAY**

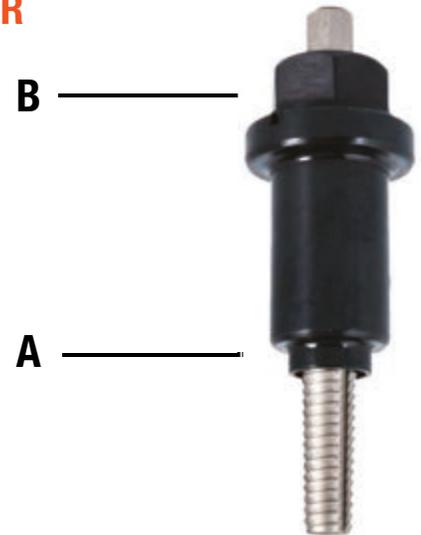

(713) 941-3797 • Toll Free: (800) 456-8721
www.USAIndustries.com

RHINO JR. MANUAL TUBE PULLER

Features

- Used for small, light duty pulling jobs
- Using a wrench screw, screw the spear "A" into the tube then begin pulling by turning nut "B". After tube is free from the tube sheet, remove by unscrewing the spear "A" while holding the tube with channellocks or a pipe wrench.
- Available for 1/4" thru 1 3/8" tubes of all Gauges.

ORDER PART NO.'S BY THE FOLLOWING: EXAMPLE IS FOR 1/2" 16 GAUGE TUBE

For complete tool: MTP-(Tube O.D.)=(Tube Gauge) = MTP-1/2-16

For spare spears: MTPS-(Tube O.D.)=(Tube Gauge) = MTPS-1/2-16

ONE REV INTERNAL TUBE CUTTER & REPLACEMENT BITS

One Revolution Internal Tube Cutters are used for the following applications:

1. The "Piercing" of tubes prior to inserting tube plugs
2. The "Complete Cutting" of ferrous or copper tubes on one end prior to tube removal - can include nonferrous light wall tubes. Used with a wrench, simply adjust the depth collar stop so the cutter bit is past the tube sheet, then rotate in a clockwise direction. After the bit starts cutting, make 1/4 revolution to puncture or one full revolution to cut

PRODUCT FEATURES:

- Available for 1/2" thru 2-1/2" tubes of all gauges
- Standard reach of 10", longer reaches available
- Bits are made from high quality tool steel and hardened to provide the maximum cutting edge retention
- Available for 1/2" thru 2-1/2" tube cutters
- Directly interchangeable with Airetool Bits

Order product number by the following:

For Complete Cutter Tool: OR-T-(Tube O.D.)-(Tube Gauge) = OR-T-1/2"-16

For Cutter Bits: OR-C-(Tube O.D.)-BIT = OR-C-1/2"-BIT

PUSH CUTTER INTERNAL TUBE CUTTER AND REPLACEMENTS

Features

The **Push Type Cutter** is used to quickly cut tubes in large numbers, they are especially suited for toughest tube cutting applications such as Stainless Steel, Inconel, Monel, Titanium, etc.

The unit can be used with any drill or one of our driving units with the cutting speed regulated for your particular tube material to maximize the cutters life.

To operate, adjust the collar depth, insert it into the tube, apply power, press inward and the tube will be cut in a few seconds.

- Available for 5/8" thru 1-1/2" tubes of all Gauges
- Bits are easily removed
- Adjustable reaches available: "STD" = 4",
"A" = 6", "B" = 8", "C" = 10"

Our bits are made from high quality tool steel, hardened, and Titanium Nitrate coated to provide the maximum cutting edge retention.

Longer reach available upon request.

Tube O.D. (in.)	Tube Gauge (BWG)	Tube Cutter Model No. (Std. Reach)	Spare Cutting Bit Model No.
5/8	14 - 22	ATP-625	ATP-625-BIT
3/4	14 - 22	ATP-750	ATP-750-BIT

BOILER TUBE CUTTER & REPLACEMENT BITS

Features

- PR-68 tube cutters are ideal for cutting thick walled boiler tubes of 2" O.D. and higher
- The unit can be operated with any drill
- For Boiler tube sizes 2" thru 4-1/2" all Gauges
- Available in standard reach of 4", Additionally reaches in increments of 4" are available up to 16"

COLLAPSING/KNOCKOUT TOOLS CHIPPING HAMMER

Features

Chipping Hammer (15 lb. Gun) for use with Tube Drifts/Collapsing Tools using the 01 or 06 Shank Style.

JUMBO RIVET BUSTER

Features

Jumbo Rivet Buster (30 lb. Gun) for use with Tube Drifts/ Knockout Punches using the 15 Shank Style.

COLLAPSING TOOL

ORDER PART NO.'S BY THE FOLLOWING: EXAMPLE IS FOR 3/4" TUBE WITH 06 SHANK		
CT-	(Tube O.D.)	(Shank)
CT-	3/4	06

Features

Collapsing Tools are designed to collapse tubes for removal from the tube sheet using a Chipping Hammer. Manufactured using the highest quality metal and heat treatment available.

- Available in 01 or 06 type shanks
- Stocked sizes from 3/8" thru 2" tube OD's
- Use Reamers for reducing the tube thickness when collapsing heavy gauge tubes.

When Ordering Specify:

- Tube O.D.
- Shank Style — 01 or 06
- Quantity
- Delivery Date

TUBE DRIFTS / KNOCKOUT PUNCHES

ORDER PART NO.'S BY THE FOLLOWING: EXAMPLE IS FOR 1" / 14 GAUGE TUBE w/15 SHANK			
TD-	(Tube O.D.)	(Tube Gauge)	(Shank)
TD-	1-	14-	15

Features

Tube Drifts/Knockout Punches are designed to knockout tubes from tube sheets using either a Chipping Hammer or Jumbo Rivet Buster. Our Drifts are manufactured using the highest quality metal and heat treatment available, PERIOD!

- Available in 01 or 06 or 15 Shank tool holders
- Stocked sizes from 1/2" thru 2-1/2" tube OD's and all gauges.

When Ordering Specify:

- Tube O.D.
- Shank Style — 01, 06 or 15
- Gauge
- Quantity
- Delivery Date

CLEANING EQUIPMENT

FSC SERIES PORTABLE ELECTRIC TUBE CLEANERS

Electric Tube Cleaners are compact, powerful, and easy to maneuver — designed to clean straight and curved tubes in heat exchangers, condensers, and boilers. A brush or boring bit attaches to a flexible shaft driven by the motor. Water feeds through the shaft to flush deposits as you work.

Features

- Hands-free foot switch control
- Water flow regulated as needed to flush deposits
- Stainless steel cover for harsh environments
- Shafts, bits, and brushes replaced quickly and easily
- Large wheels for easy transport

Available Models

FSC-4 — Most commonly used for chiller tubes up to 5/8" ID (Trane, Carrier, York, and others). 1/2 HP @ 890 RPM.

FSC-5 — Same as FSC-4 with a more powerful 3/4 HP motor @ 890 RPM for tougher deposits. Includes dual-direction foot switch.

FSC-4X — Heavy-duty system for tube IDs 1" and larger. 1 HP @ 1780 RPM.

FSC-4X-2A — Maximum duty for the toughest jobs on tubes 1" and larger. 2 HP @ 1780 RPM.

ALL CLEANERS CAN BE ORDERED INDIVIDUALLY OR AS A KIT

Each Kit is provided with the following:

- 1 ea - Tube Cleaner
- 1 ea - Foot Control Switch
- 2 ea - Flexible Shafts
- 20 ea - Nylon Brushes of your size choice
- 2 ea - Buffing Tools of your size choice
- 1 ea - Flexible Shaft repair kit

- Tube sizes 1/4" & 3/8" have 8-32 thread female tooling connectors
- Tube sizes 7/16" thru 1" have 1/4"-28 thread female tooling connectors
- Tube Sizes 1" & larger have 1/4"-28 thread female tooling connectors

BRUSHES

USED WITH EITHER THE FLEX-SHAFT CLEANERS OR THE CG 625/1250

Nylon Brushes — "N"

Used for removing soft deposits in any tube material, especially useful for final 'finishing' of tubes.

Spin Grit — "SN"

Used for removing soft and light scale deposits in any tube material. The Nylon Brushes are impregnated with a Silicon Abrasive Grit to clean and polish.

Stainless Steel Brushes — "SS"

Used for removing soft and light scale deposits in carbon steel, stainless steel, monel, titanium, etc.

Brass Brushes — "B"

Used for removing soft and light scale deposits in copper, brass, and their alloyed tubes.

Flue - Carbon Steel & Nylon Brushes

Carbon Steel is recommended for removing soft and light scale deposits in ferrous tubes and Nylon for final polishing. Flue Brushes 4" & Larger sized in increments.

SPECIAL NOTE: Brushes larger than 1" are provided in 1/4" increments up to 8" OD.

When ordering, specify:

- Tube ID
- Quantity
- Use <= by 1/16" Increments
- Delivery Date
- Brush type

SPIN GRIT SIZES

CG625/1250 PNEUMATIC TUBE CLEANING GUN

Cleans plugged tubes or piping safer, faster and cheaper than any other method.

The **CG625/1250 Tube Cleaning Gun** turns a special brush or drill coupled to shaft while supplying a stream of water to flush out deposits and increase drilli water flow is adjustable as needed.

Moderately plugged tubes can be cleaned with our Metal or Nylon brushes. tubes are first drilled out using either an Arrow or Carbide tip drill then follow to remove the remaining deposits and “Polish” the tube. The hollow shaft extension tubes can be provided in 2’ length increments up to 8’, extensions are added to provide the total length needed. Adding extensions is fast and easy.

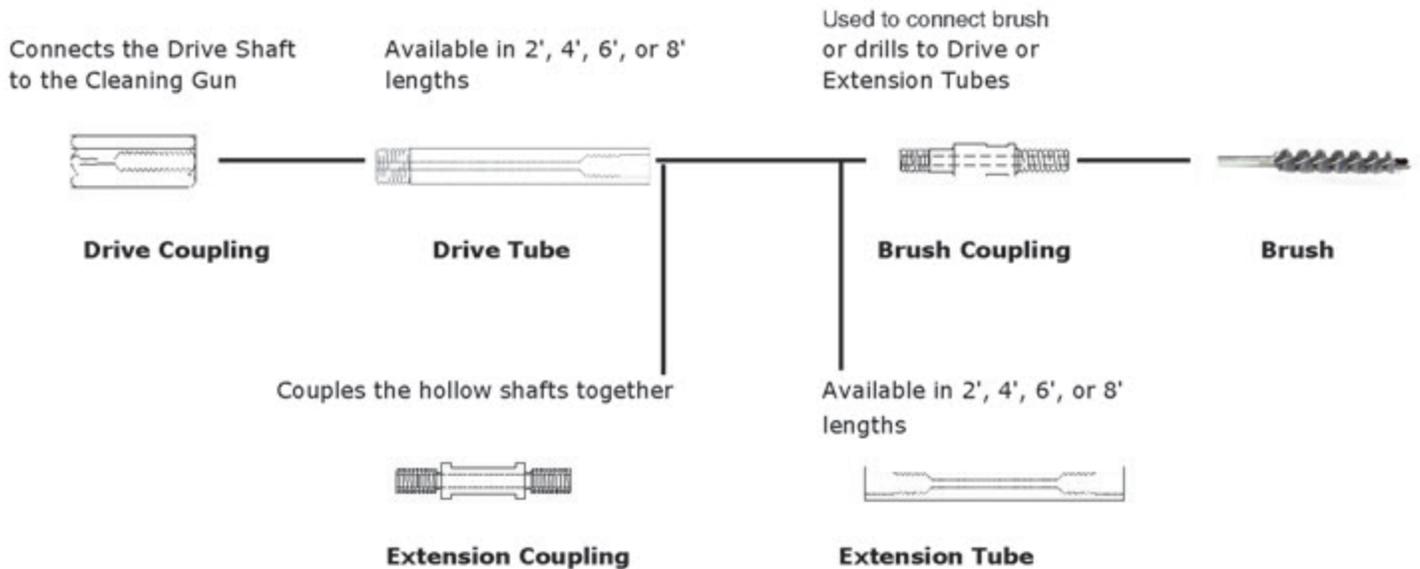

Each Kit is provided with the following:

- 1 ea — Cleaning Gun
- 1 ea — Storage Case
- 2 ea — 10’ hoses for air and water connections
- 1 ea — Drive Coupling
- 1 ea — Arrow drill & Brush of your size choice

When ordering, specify:

- Tube Size
- Length of Tubing
- Brush or Drill type
- Quantity
- Delivery Date

CLEANING GUN TOOLS

Used with either the Flex-Shaft cleaner or the CG 625/1250

- Best suited to remove medium buildup in tubes
- Drills available in 1/16" increments — starting at 1/4" through 1 1/2" Tube I.D.

See *CG625/1250 Accessories chart, page HE-68*

When ordering, specify:

- Tube I.D.
- Quantity
- Type of Drill
- Delivery Date

ARROW POINT ALLOY META

- Best suited to remove Heavy buildup in plugged tubes
- Drills available in 1/16" increments — starting at 1/4" through 1 1/2" Tube I.D.

See *CG625/1250 Accessories chart, page HE-68*

When ordering, specify:

- Tube I.D.
- Quantity
- Type of Drill
- Delivery Date

CARBIDE TWIST DRILL

BUFFING TOOLS

Used with either the Flex-Shaft cleaners or the CG 625/1250

Buffing Tools are used for final polishing or removal of light and soft deposits from ferrous and non-ferrous tubes that have been previously cleaned. Used in straight or very large radius tubes in a clockwise direction only.

Tube I.D.		Buffing Tool	With Drill Tip	Replacement Blades	Adjusting Jig

THE SAFER, FASTER & SMARTER CHOICE!

SNAP IT™

JR & SR
ENGINEERED TUBE PLUGS

*Meets ASME PCC-2 2018 standards
For use in heat exchanger, boiler and condenser tubes.*

TUBE PLUGS

“Plugs from the Tube Plug Pros”

We offer an extensive range of tube plugs, including our premium **Snap It® Engineered Tube Plugs** designed for superior performance with pressure ratings of up to 7,000 psid and through-the-tube plugging capabilities. Additionally, our metal tapered plugs are available in over 20 stocked metals. Explore our selection of cork, wood, fiber, rubber tapered, and expandable rubber plugs in stock, or let us custom manufacture plugs to match your material and size requirements precisely.

SNAP IT™

JR & SR
ENGINEERED TUBE PLUGS

The Fastest, Safest, Most Cost-Effective Way to Plug Tubes

“Consistent, Controlled Installation” & “Through-The-Tube Plugging”

Brush the tube end, insert the plug, and snap it in place — the entire procedure takes less than one minute per tube. Rated at 1,000 psid holding pressure. When installed properly, these plugs remove all the guess work related to installation.

No welding. No tube sheet damage. No leaks. No worry.

Environmentally Superior
Due to **POSITIVE SEALING***
with Superior Design!

SAFETY	TIME & COST SAVINGS
<ul style="list-style-type: none"> • Blowout pressures exceeding 15,000 PSID (plug size dependent) • No welding - eliminates sparks & open flames • Plug design minimizes projectile risk during removal • Leak free helium seal to 1×10^{-9} c/sec 	<ul style="list-style-type: none"> • No need to remove head cover for through-the-tube plugging • Less than a minute installation time results in 80% labor cost savings while reducing downtime • Eliminates tube sheet and ligament damage from welding and over-driving • Significantly reduces reloading times when plugging tubular reactors

< 1 MIN
per tube installation

up to 1,000 PSID
rated holding pressure

> 15,000 PSID
blowout pressure

80%+
labor cost savings

RECOMMENDED INSTALLATION STEPS

<i>Pierce tube with USAI's One-Rev Cutter</i>	<i>Brush tube ID to remove scale, pitting & ovality</i>	<i>Snap plug into place</i>	Done!
---	---	-----------------------------	--------------

ADDITIONAL CAPABILITIES

- Ideal for Fin-Fan® headers, heat exchangers, boilers, condensers, and tube reactors
- Each plug fits multiple tube sizes — available in numerous materials
- Near & far-end plugging capabilities
- All tooling fully compatible with competitor systems

Fin-Fan® is a registered trademark of Hudson Products Corporation

View our video online.

WARNING:
Never stand in front of an installed plug under pressure. Plugs ejected under pressure can cause serious bodily injury.

"<>"

Substitute the suffix "<>" with the following material code: **C** - carbon steel, **S** - 316 stainless steel, **B** - brass, **Y** - Cr/Moly, **M** - monel, **K** - 90/10 CuNi, **J** - 70/30 CuNi. Other materials available.

"[]"

For brass, copper, or copper-nickel tubes add the suffix **LD** to the Brush Kit Tube Preparation Brushes

"{ }"

Channel Head Pull Rod Assemblies are available in 2', 4', or 6' lengths. Insert the appropriate # for the length required.

Vent tube using our One Rev tool (see page HE-60)

WHEN ORDERING, SPECIFY:

- Tube ID or OD and bwg/wall thickness
- Material
- Maximum temperature and pressure
- The type of tube or tube sheet joint (rolled, welded, etc.)
- # of Brush Kits required
- If Pull Rod, Channel Head Pull Rod or Plug Positioner is needed
- Quantity
- Delivery Date

All tube inner diameters listed are based upon a 10% wall reduction

NOTES:

- 1) Tube ID's often vary between inlet & outlet due to corrosion and/or erosion, this chart used as Reference only.
- 2) Tube Preparation Brushes are required for use with all Jr Plugs.

Substitute the suffix "<>" with the following material code:

- | | | |
|------------------|-----------------|----------------|
| C = Carbon Steel | K = 90/10 CuNi | N = Nickel 200 |
| B = Brass | Y = Chrome/Moly | T = Titanium |
| S = 316 SS | M = Monel | H = Hastelloy |
| J = 70/30 CuNi | I = Inconel | Z = Zirconium |

The Fastest, Safest, Most Cost-Effective Way to Plug Tubes

“Consistent, Controlled Installation” For Critical Pressure Applications

Brush the tube end, insert the plug, and snap it in place — the entire procedure takes less than one minute per tube. Rated at 1,000 psid holding pressure. When installed properly, these plugs remove all the guess work related to installation.

No welding. No tube sheet damage. No leaks. No worry.

SAFETY	TIME & COST SAVINGS
<ul style="list-style-type: none"> • Blowout pressures exceeding 28,000 PSID (plug size dependent) • No welding - eliminates sparks & open flames • Plug design minimizes projectile risk during removal • Leak free helium seal to 1×10^{-9} c/sec 	<ul style="list-style-type: none"> • No need to remove head cover for through-the-tube plugging • Less than a minute installation time results in 80% labor cost savings while reducing downtime • Eliminates tube sheet and ligament damage from welding and over-driving

PLUG SIZES			PRESSURE RATING	
0.400	→	0.680	=	7000 PSID
0.700	→	0.960	=	4500 PSID
0.980	→	2.000	=	2000 PSID

RECOMMENDED INSTALLATION STEPS

<i>Pierce tube with USAI's One-Rev Cutter</i>	<i>Brush tube ID to remove scale, pitting & ovality</i>	<i>Snap plug into place</i>	<i>Done!</i>
---	---	-----------------------------	--------------

ADDITIONAL CAPABILITIES

- Ideal for Fin-Fan® headers, heat exchangers, boilers, condensers, and tube reactors
- Each plug fits multiple tube sizes — available in numerous materials
- Near & far-end plugging capabilities
- All tooling fully compatible with competitor systems

Fin-Fan® is a registered trademark of Hudson Products Corporation

Environmentally Superior Due to POSITIVE SEALING with Superior Design!*

< 1 MIN
per tube installation

up to 7,000 PSID
rated holding pressure

> 28,000 PSID
blowout pressure

80%+
labor cost savings

View our video online.

WARNING:
Never stand in front of an installed plug under pressure. Plugs ejected under pressure can cause serious bodily injury.

NOTES: Standard Sr. Kit includes 10 plugs, 1 Brush and 1 "GO/NO GO" gauge; however, plugs and items can be ordered individually. **Consult factory for more information.**

"< >"

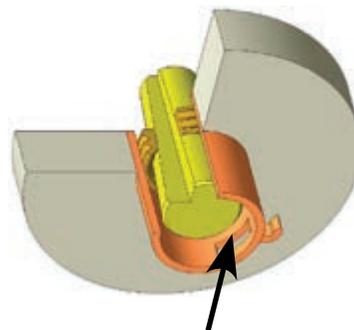

Substitute the suffix "< >" with the following material code: **C** - carbon steel, **S** - 316 stainless steel, **B** - brass, **Y** - Cr/Moly, **M** - monel, **K** - 90/10 CuNi, **J** - 70/30 CuNi. Other materials available.

"[]"

For brass, copper, or copper-nickel tubes add the suffix - **LD** to the Brush Kit Tube Preparation Brushes

"{ }"

Channel Head Pull Rod Assemblies are available in 2', 4', or 6' lengths. Insert the appropriate # for the length required.

Vent tube using our One Rev tool (see page HE-60)

WHEN ORDERING, SPECIFY:

- Tube ID
- Material
- Maximum temperature and pressure
- The type of tube or tube sheet joint (rolled, welded, etc.)
- If Pull Rod, Channel Head Pull Rod or Plug Positioner is needed
- Quantity
- Delivery Date

SNAP IT® JR & SR TOOLS

TUBE PREPARATION

Use our special **brushes** to properly prep the tube for optimum sealing & holding forces — see Plug Size charts.

- Jr. Brush Kits come with 3 or 4 brushes per kit, dependent on plug size Use the smallest brush in the kit that effectively cleans and preps the tube.
- Sr. brushes are provided for the specific tube size ordered.

INSTALLATION TOOLS

Hydraulic Tool — THE SIMPLEST, SAFEST AND EASIEST WAY TO INSTALL SNAP IT SR. OR JR. PLUGS! The Snap It Installation Kit is compact and lightweight (ram weighs just 7 lbs) yet has plenty of power to easily install all of our plugs. The pump is air driven and requires 80 to 120 lbs. of supply air @ 20 CFM during the few seconds it is operated and comes in a durable storage case on wheels. When ordering the complete kit - it comes with everything needed for installing Jr. or Sr. plugs for near end applications.

Through-the-tube plugging is performed with this tool by adding the appropriate number of extension assemblies with a Channel Head Pull Rod Assembly and following the “through-the-tube” instructions. Peace of mind — when you order this complete kit.

Pull Rod Assembly — used with the Hydraulic RAM, this installs the plug(s) in place. Our assemblies are fully interchangeable with competitor systems and have been designed to minimize your costs by utilizing multiple plug positioners with each pull rod size — See Plug Size Chart.

Channel Head Pull Rod Assemblies & Extension Sets — Used to operate the system and easily install plugs where Channel Heads are present. Also these are used in conjunction with the extension sets for “through-the-tube” plugging — See Plug Size chart.

REMOVAL TOOL

Plug Removal Tool — designed to easily and quickly remove installed plugs. The Plug Removal Tool removes both the pin and ring in seconds without damage to the tube it was installed in. Simply screw the Spear Stud into the installed pin, dislodge the pin with the slide hammer, screw the spear into the ring, then use the slide hammer to pull out all the pieces.

If required, a new plug can then be reinstalled in the same place!

NOTE: Contact Factory for Sizing Details.

Note:

Always puncture the tube before installing any plug to ensure that pressure cannot build up in the tube and cause the plugs to loosen or blow out.

For puncturing tubes, see our One Rev Cutters on page HE-60.

WHEN ORDERING, SPECIFY:

- TP# based on size of your plug (see chart)
- Material of construction
- For custom plugs, provide “A” “B” & “L” dimensions
- Quantity
- Delivery Date

“<>” = replace “<>” with material of construction required - see Chart above.

WARNING: Never stand in front of an installed plug under pressure. Plugs ejected under pressure can cause serious bodily injury.

METAL TAPERED TWO-PIECE TUBE PLUGS

Designed to minimize damage to the tube sheet while sealing off leaky condenser and exchanger tubes - *Installation is Simple!* Insert ring into the tube, insert pin into the ring, hammer until properly sealed. Like the Metal Tapered plugs, these can be removed with a pipe wrench.

For more consistent & controlled installation, see our “Snap It” line of plugs starting on page TP-72

- Available in sizes from 3/8” to 2” tubes
- Stocked materials: brass, carbon steel and stainless steel
- Custom sizes and materials available upon request

NON-METAL TAPERED TUBE PLUGS

***SEE DIMENSIONS ON PAGE TP-78 CHART**
(Metal Tapered Tube Plug chart)

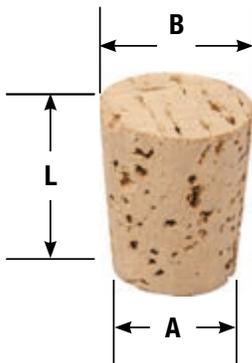

Available in fiber (Phenolic or Micarta) or wood. These plugs are safe, easy to use, corrosion resistant, and easily removed. Slightly hammer the plug into the tube, it will expand by hydrosopic action to make an excellent seal and will not damage the tube sheet.

- Rated up to 230° F
- Order by Tube Size and Gauge
- Use our standard sizes or Yours

WHEN ORDERING, SPECIFY:

- TP# based on size of your plug (see chart)
- Material of construction
- For custom plugs, provide "A" "B" & "L" dimensions
- Quantity
- Delivery Date

CORK TUBE PLUGS

WHEN ORDERING, SPECIFY:

- TP# based on size of your plug (see chart)
- Material of construction
- For custom plugs, provide "A" "B" & "L" dimensions
- Quantity
- Delivery Date

RUBBER TAPERED TUBE PLUGS

Used for low pressure isolation or vacuum testing applications (especially with our Vacuum Leak Detector VLD-2500 - see Section 4, page HE-54). Stocked sizes range from 5/16" tube I.D. through 4-3/4" tube I.D. The plugs are made of neoprene and are reusable.

Temperature range: -25°F to +180°F (-31°C to 82°C).

WHEN ORDERING, SPECIFY:

- TP# based on size of your plug (see chart)
- Quantity
- Delivery Date

SHOULDER / HEADER PLUGS

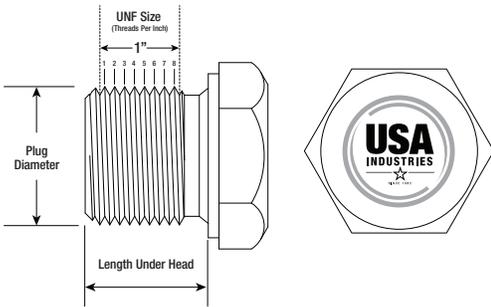

Made for Fin-Fan® header boxes and available in carbon steel (coated or uncoated), stainless steel, brass and other materials.

- Sizes available for 5/8" through 2" tube
- When ordering, specify the plug diameter & length (verify the thread and hex sizes are correct)
- Custom sizes & material available upon request
- Length under head available 3/4" - 3"
- Specify your needs for custom orders

Environmentally Superior Due to POSITIVE SEALING* with Superior Design!

WHEN ORDERING PLUGS, SPECIFY:

- Plug Threaded Hole Size (Plug Diameter)
- UNF Size (threads per inch)
- Length under Head
- Material of Construction
- Quantity
- Delivery Date

WHEN ORDERING GASKETS, SPECIFY:

- Flat Gasket or EZ Torque
- Plug Threaded Hole Size
- Material of Construction
- Quantity
- Delivery Date

* Torque values based on proper installation. ** Typically stocked lengths

Substitute the suffix "<>" with the following material code:

- C = Carbon Steel
- B = Brass
- S = 316 SS
- J = 70/30 CuNi
- K = 90/10 CuNi
- Y = Chrome/Moly
- M = Monel
- I = Inconel
- N = Nickel 200
- T = Titanium
- H = Hastelloy
- Z = Zirconium
- *Other alloys available.

Note 1: All values listed in Ft / lbs are recommended minimum torque values

Note 2: The Recommended Minimum Torque Values for the Flat Gaskets are based on ideal sealing surface conditions, meeting ASME Specs. Typically encountered surface area imperfections do not affect the values given for EZ Torque® Gaskets.

Note 3: The Minimum Recommended Torque Values given for EZ Torque® Gaskets are higher than the Theoretical Torque Values to ensure Thread Locking.

Available Coatings: Cadmium, Electroless Nickel, Galvanized, Nickel, Zinc or Uncoated. Other coatings available.

Fin-Fan® is a Registered Trademark of Hudson Products Corporation

WARNING: Never stand in front of an installed plug under pressure. Plugs ejected under pressure can cause serious bodily injury.

EZ TORQUE® SURE SEAL GASKETS

**ENVIRONMENTALLY SUPERIOR
-NO LEAKS / POSITIVE SEALING***

MACHINED METAL CORE WITH BONDED GRAPHITE FACE.

USA Industries' EZ Torque Sure Seal Gaskets are designed to provide a positive seal and require less than half the installation torque required for typical soft iron gaskets. Lower torque means no more stripping of threads which prevents the gasket from sealing.

Our innovative design incorporates a graphite outer shell over a special machined metal inner core. The labyrinth design allows the graphite to be compressed and held in place, sealing against imperfections on the surface area. Due to the compressive load stored in the gasket's design, leaks due to typical thermal cycling are eliminated.

The graphite outer shell virtually eliminates the need to remachine the gasket surface areas due to roughness, nicks or scratches typically found in the field.

Nominal Size (in)	EZ Torque Gasket ID (in)	Gasket OD (in)	AISI 1008		304 Stainless		316 Stainless		Nickel 200		Monel 400		2205 Duplex

NOTE: The minimum recommended torque values given for EZ Torque Gaskets are higher than the theoretical torque values to ensure thread locking.

BENEFITS

- Low torque design
- Eliminates stripping the threads by over-torquing to seal
- No environmental leaks
- Virtually eliminates field remachining
- Cost effective. Low cost of ownership.
- Saves time. During removal, graphite prevents gasket from seizing to header or plug.
- Graphite eliminates atmospheric corrosion
- Metal core available in any material type - 316SS, Inconel, Hastelloy, Nickel, etc.
- Can be used with existing plugs in the field
- Self-aligning when used with USA Industries, Inc.'s manufactured plugs
- Quick delivery - Available 24/7-365

See Chart on page TP-82 for size and part number

When Ordering Gaskets Specify:

Plug Threaded Hole Size • Material of Construction
Quantity • Delivery Date

Material codes:

C = Carbon	K = 90/10 CuNi	N = Nickel
B = Brass	Y = Chrome/Moly	T = Titanium
S = 316SS	M = Monel	H = Hastelloy
J = 70/30 CuNi	I = Inconel	Z = Zirconium

Other alloys available.

* Based on proper installation.

LOW & HIGH PRESSURE INTERNAL AND FLANGED TUBE PLUGS

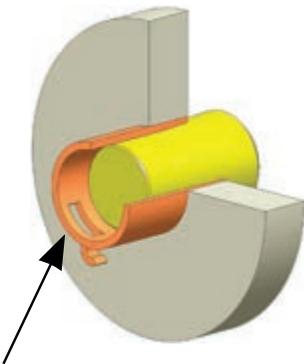

The tube condenser plug that gives you **“Performance Under Pressure”** - up to 100 psi. Standard sizes listed in stock, giving you same day shipping on most plugs. Special sizes and plugs trimmed to your requirements are available upon request. The plugs are inserted into the tubing (*if flanged, mate flange up to the tube*) finger-tighten and then secure with the appropriate socket wrench unit the proper seal is made.

- Made of neoprene
- Grade K-2247-CF, ASTM-BC 412 45+/-5 Durometer hardness
- Resistant to oil and gasoline
- Temperature range: -45°F to +300°F (-43°C to 149°C)
- Easy to use and reusable
- Rated to 100 psi when installed properly
- Safety lanyards can be installed (*at an additional cost*) to assure operator’s protection
- Specify hardware: carbon steel, stainless steel, brass

WHEN ORDERING, SPECIFY:

- TP# based on size of your plug (see chart)
- Specify Internal or Flanged
- Specify Single or Double Seal
- Hardware (CS, SS, BRASS)
- Quantity
- Delivery Date

Note:
Always puncture the tube before installing any plug to ensure that pressure cannot build up in the tube and cause the plugs to loosen or blow out.

For puncturing tubes, see our One Rev Cutters on page HE-60.

THREADED TAPERED TUBE PLUGS

Plugs Holes Through Sides or Ends of Piping, Tubing, or Vessels

A fast and simple way to stop leaks in tanks, pipes, etc. Threaded plugs are manufactured using heat treated alloy steel or stainless steel. To install, use a standard Hex wrench or socket.

- Self tapping
- Stocked in: alloy steel and stainless steel

WHEN ORDERING, SPECIFY:

- TP# Based on size of your plug (see chart)
- Material of Construction
- Quantity
- Delivery Date

ANODE PLUGS - Zinc Corrosion Plugs

USA INDUSTRIES' zinc plugs help protect heat exchangers, pipelines, tanks, pumps and many other pieces of equipment from corrosion. The zinc rod is consumed by any electrolytic action that would otherwise attack and corrode equipment.

NOTE: For sizes larger than 1" NPT use 1" part numbers and install in a reducing bushing.

WHEN ORDERING, SPECIFY:

- Length of Anode
- Size of plug (see chart)
- Quantity
- Delivery Date

CUSTOM MACHINING

With state of the art CNC machinery, USA Industries can manufacture parts to meet your particular needs for your design and material specification.

From 1 piece to 1,000,000 pieces - we can provide tolerances of +/-1 mils and turn up to 80" OD on our lathes.

Pulleys, alignment pins, collars, subs, threading inserts, bolts, collar bolts, specialty flanges for turbines, specialty ferrules, parts for aerospace industry, etc.... From 1 piece to 1,000,000, USA Industries has the capabilities to manufacture parts of most any design for you.

Our machining capabilities include CNC 5 & 4 Axis Mills, Lathes, Waterjet, Plasma & Oxyfuel, Optical CMM's Engine Lathes, Radial Drills, Laser Engravers, Knee Mills and more.

**Contact us with your specific needs

GRIPSAFE[®] ST

The most significant innovation in pipe isolation and testing technology in over 65 years!

**SUPERIOR
TECHNOLOGY**

APPLICATIONS INCLUDE:

- Pipe Testing • Flange Weld Testing • Pipe Spool Testing • Line Purging • Isolation
- Positive Isolation Monitoring • Pre/Post Weld Operations

**For Information on GripSafe[®] ST
see Section 1, Pages 12 - 17**

For the latest GripSafeST patent and trademark information, go to:
